

Product Overview

Symmetry Enterprise is the ideal choice for any organization needing a high-performance client/server security solution with one centralized database.

Symmetry Enterprise uses the powerful Microsoft® SQL Server database, which meets the requirements of high performance and scalability for systems handling large amounts of data.

For ease of use, each client can be set up to display only the required options necessary for the operator to carry out the allocated tasks, such as alarms monitoring. Alarms can be routed to different clients depending on time of day or type of alarm. Client access is also available using a Web browser with the optional Web Access module.

Symmetry Enterprise provides a comprehensive range of standard features, with additional options available for specialist requirements. A wide variety of readers is supported smart card, CAC, biometric, proximity and magnetic stripe. In addition, Symmetry Enterprise employs an open architecture, giving the ability to import data from other databases.

Symmetry Enterprise includes database partitioning, allowing a single system to be shared by multiple organizations.

Key Features

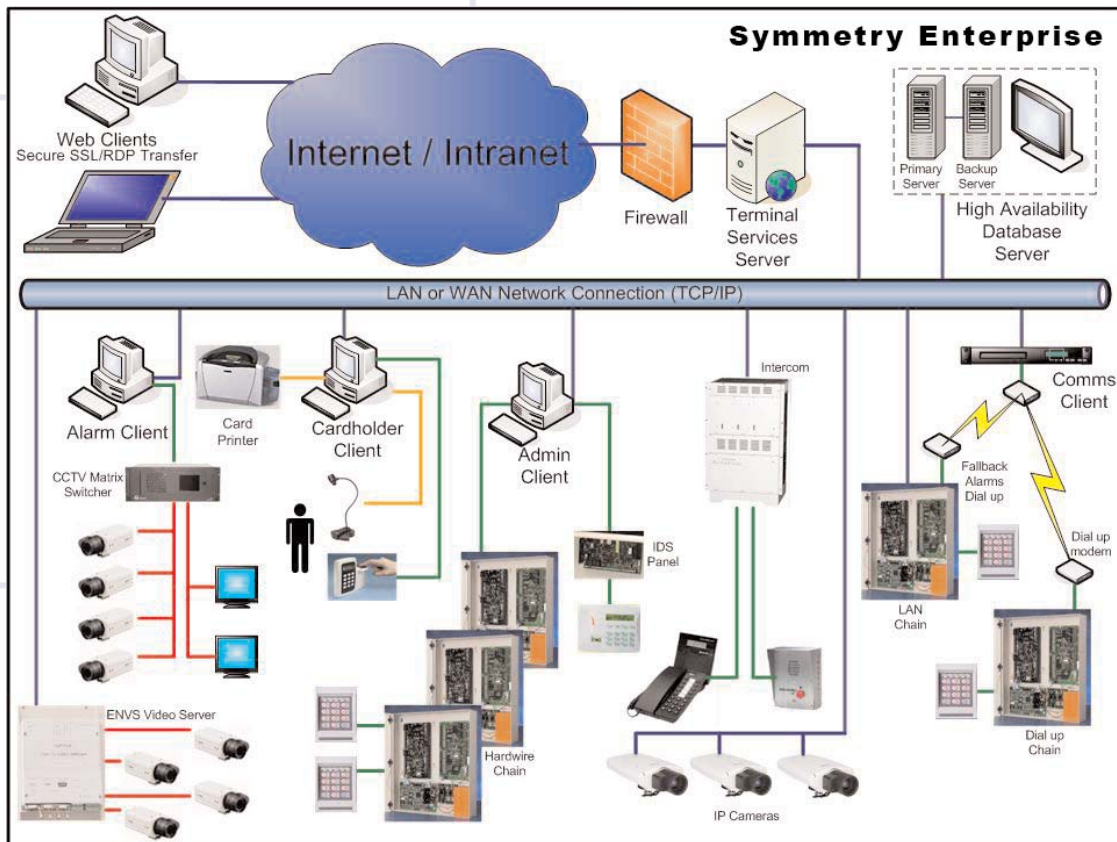

- **Scaleable single-server Access Control and Security Management Solution for large organizations**
- **Unrestricted number of clients, readers and card holders**
- **Uses Microsoft® SQL Server Database**
- **Employs the very latest thinking in user interface design**
- **Fully LAN and WAN compatible using minimal band width**
- **Supports redundant server "hot standby fail-over"**
- **Video Badging and Visitor Management software as standard**
- **Database partitioning for multiple company or departmental systems**
- **Comprehensive alarm handling features**
- **Provides options to control CCTV systems, digital video recorders, intercom systems and alarm panels**
- **Open architecture with various integration options**

Optional Management Software

Software packages offer a range of fully-integrated additional features designed to enhance the system and provide higher levels of flexibility and integration. Optional features include:

- Symmetry Video Management
- Threat Level Manager (TLM®)
- Intrusion Interface Module
- Web Access
- XML Developer's Kit
- Building Control Module
- Intercom Management

- Directory Sync Manager
- Guard Patrol Management
- Muster Management (Safety Roll Call)
- Smart Card Management
- Data Connect Import/Export
