

Description

Fire Warden Stations

The Gamewell Fire Warden telephones are manufactured to the usual high standard of quality that has become synonymous with the word Gamewell. There are models to meet almost every application. All models feature the Municipal type fire alarm lock which has become familiar to fire department personnel for years or magnetic latching. In situations where access to the fire warden telephone is desirable without the use of the key, the breakglass or magnetic latching models can be provided. Either the breakglass or the non-breakglass version of the fire warden telephones is also available with armored cable.

Fire Warden Stations

Fire Phone Jacks

The remote phone jacks are available in two different variations. The 30045 is a fire phone jack mounted to a single gang electrical plate. The 30045-1 has a breakglass in front of the jack to eliminate tampering.

All versions of the fire warden's telephones and phone jacks are provided with dry contacts which can be used for auxiliary functions. (Example: to disconnect the speaker closest to the phone to eliminate any unwanted audio interference while that particular phone is in use.)

30045

30045-1

67712

Fire Fighter Phone Handset

The Fire Fighter Portable Handset (67712) is constructed of high impact plastic. It comes with a 6' coiled cord with an audio jack connector. Five (5) handsets can be housed in the GV-FFPC.

Fire Fighter Phone Cabinet

The Fire Fighter Phone Cabinet (GV-FFPC) is a rugged, surface mount RED metal cabinet. The cabinet is lockable and is shipped with the words "FIREMAN TELEPHONES" labeled on the front of the cabinet. Shipped with a right hand hinge. The GV-FFPC has the capacity to store 5 Fire Fighter Handsets (67712).

Fire Fighter Phone Cabinet
